Centre of Research Excellence:
Indigenous Sovereignty & Smoking

Suki and tobacco use among the iTaukei people of Fiji: Bibliography

About 5 per cent (about 350 million) of the world's population is recognized as indigenous and smoking prevalence is disproportionately higher among many Indigenous peoples. There is a lack of research on smoking prevalence and cessation behavior among most of these indigenous groups. Further, where research exists, the results suggest that existing tobacco control programmes have not been as effective for indigenous people. Understanding why this is so and identifying what else can be done to reduce smoking-related harm among indigenous people will contribute to reducing the inequities many indigenous people still experience.

The goal of the *Centre of Research Excellence: Indigenous Sovereignty & Smoking* is to advance knowledge on Indigenous tobacco use and how to more rapidly reduce smoking harm among Indigenous people worldwide.

We will do this by:

- Identifying Indigenous tobacco harm reduction strategies and interventions.
- Identifying strategies to support Indigenous tobacco smallholders to change their business model.
- Building the research capacity of Indigenous people so that they may devise their own culturally appropriate solutions to reduce the negative consequences of smoking.

Towards our goal we will compile a bibliography of all the literature we considered during the conduct of each study. After publication of the study report or journal articles, a PDF of the bibliography will be downloadable from our Centre website www.coreiss.com.

HOW TO USE THIS BIBLIOGRAPHY

When looking for a specific topic in the Bibliography, use the Find or 'Find on Page' function on your browser or use the keyboard shortcut 'Ctrl + F'. Then enter a keyword (e.g., suki) on the search bar and use the arrows or scroll down to scan through the whole document. The keyword will be highlighted where it is present.

The bibliography is sorted by the chapter headings used the study report. In this bibliography, sources are provided on the following topics:

- About Fiji
- iTaukei Health
- Suki and tobacco in Fiji
- Kava
- Tobacco Control

The *Suki and tobacco use among the iTaukei people of Fiji* report is available for download from our website: info@coreiss.com. On our website you can also register your email to receive notifications of new publications.

FUNDING

This document has been produced with the help of a grant from the Foundation for a Smoke-Free World, Inc. The contents, selection and presentation of facts, as well as any opinions expressed herein are the sole responsibility of the authors and under no circumstances shall be regarded as reflecting the positions of the Foundation for a Smoke-Free World, Inc.
